Palisades-Cattle guards

Palisades as required did install two cattle guards with gates that border the access roads leading up to the range and the Stanley property along with full parameter fencing. This has shown to be sufficient in keeping the horses from coming down from the range in this direct location. Cattle guards (horse guards) located at the roundabout on McCauley Ranch Blvd and Gold Mine Dr. are not a factor in helping to keep the horses off the streets and up on the range. We agree with the removal of these.

Please contact us if you have any questions or if we can be of any service.

Respectfully,

Coreenna Vance
