Can you start a tab for Stonegate please? Date TBD

Take care!

I just saw on the news that the north valleys Stonegate project was approved and will be sent to city council. PLEASE, FOR HEAVEN'S SAKE!! DO NOT LET IT PROCEED FORWARD!!! 5000 new houses would add to a nightmare of traffic already happening in the north valley area. There is so much new construction going on that our infrastructure can not handle this out of control growth. Woodland Village still has over 400

house to go, that is as we speak making the commute out of Cold Springs bad enough as it is.

Highway 395 north and south need 3 lanes from I80 to Red Rock at least and north Virginia street needs to be double lanes and paved from Red Rock to Cold Springs exit which is just a gravel road right now.

I'm sick that this mess might get the go ahead without seeing what it will do to overcrowd and already bulging city.

Please use common sense and not look at the dollar sign on this one. There are already many house and apartment projects underway and this will be a mess in the making.

Thank you, Gary Moore
