Dear Mayor Schieve,

I just bought a house out in Cold Springs in May. I did so because I wanted to get away from the congestion that has taken over the Stead area. I know you and the council don't give a damn how the people who live out here feel about having 5000 more houses shoved down our throats. As long as the developer throws money at the city they will get to do what ever they want. Sure your not going to have your views destroyed by urban sprawl and your not going to have to sit in traffic morning and night. It already takes anywhere from an hour to 2 hours to drive into town during the morning and afternoon commute but let's add more cars to the mix. I moved our here to get away from the crime that has taken root in the stead and lemon valley area, I actually finally feel safe and peaceful. I don't have police cars on my street every day like we used to. Please don't make my huge expenditure of buying a house that was quite a bit more than one in stead would have been a total waste because of city greed and a developers need to cover every inch of open land with buildings. There has to be an end to greed that consumes big developers and the city.

I object to the diversion of the natural watershed (Stonegate) into White lake. Village pkwy was already under water this year. I believe diverting another flood plain and the displacement of the lake with the proposed commercial and industrial plan will create another Lemon Valley. Also with flooding emergency services may not be able to access the area when the roads into Woodland Village are flooded. We won't get into the traffic nightmare. Should flooding occur I have officially objected.
