Hi Brook,

Please see below. NDOT's Roadway Design division did a quick large vehicle turning analysis for those intersections in Verdi. Based on the results, they believe there would be no issues with busses or RVs making those turns.

Apologies that we weren't able to get this info in time for the meeting. Please let us know if you have any additional questions or concerns.

Thank you and have a great weekend!

Alex Wolfson

Subject: RE: I-80 Verdi Boat and RV - Trip Generation Estimate

Hi Alex,

We got the new AutoTURN software installed this afternoon. I know this is probably late for the meeting tonight but here it is anyway!

Those turns can be navigated by up to a WB-40 without off-tracking into oncoming traffic. A large bus or RV would have no problems.

Have a good one,

Devin Cartwright
