E.2 Staff Report (For Possible Action): Acceptance of the continuation of the 2013 Violence Against Women STOP (Services-Training-Officers-Prosecutors) Grant Award from the Nevada Office of the Attorney General to support the Victim Response Coordinator position in the Victim Services Unit of the Reno Police Department in the amount of $35,000. 1:34 PM

Recommendation: Staff recommends acceptance of the continuation of the 2013 Violence Against Women STOP (Services-Training-Officers-Prosecutors) Grant Award from the Nevada Office of the Attorney General to support the Victim Response Coordinator position in the Victim Services Unit of the Reno Police Department in the amount of $35,000 and authorize the police chief to sign the necessary grant documents.

Proposed Motion: I move to approve staff recommendation.

THIS ITEM WAS PULLED FOR DISCUSSION.

Council Member Brekhus asked about the grant term. Steve Pitts, Chief of Police, stated that they have agreed to a funding cycle for the final two quarters of their fiscal year from now until June of 2015. It will then be automatically approved to July of next year.

Council Member Brekhus asked what was done with the grant money last year. Lori Fralick, Director of Victim Services, stated that the grant was awarded in December of 2013. The position was posted and then closed on April 30, 2014. The position was offered but there were two people that did not move forward in the background check so the money was not used that year. Ms. Fralick also explained that the reason for the 6 month award is that the Attorney General's office is switching to a fiscal year award to be similar to Department of Children and Family Services' (DCFS's) grant cycles. Ms. Fralick confirmed that this is the same position that came before the Council last year and has not yet been filled.

Council Member Bobzien asked how the City's carbon footprint is measured and how this type of program would fit into that effort to benchmark, record, and monitor progress. John Flansberg, Director of Public Works, stated that as of 2013 the City has recorded about a 29% reduction in our carbon footprint using available data going back to 2002. Energy, natural gas, and fuel consumption are some of the criteria that go into calculating that reduction.

Council Member Bobzien requested a future discussion on how to get information on the City's efforts and long-term progress to the public.

(Stantec) for engineering services associated with the Truckee Meadows Water Reclamation Facility (TMWRF) Septage Receiving Project, in the amount of $53,197 with Reno's share being $36,509.10 (Sewer Enterprise Fund).  1:44 PM

Recommendation: Staff recommends Council approval of the Amendment to the Consultant Agreement with Stantec for Engineering Services associated with the TMWRF Septage Receiving Project in the amount of $53,197 (Reno's share being $36,509.10 from the Sewer Enterprise Fund) and authorize the Mayor to execute the attached Amendment.

Proposed Motion: I move to approve staff recommendation.

THIS ITEM WAS PULLED FOR DISCUSSION.

Council Member Brekhus requested information on the project scope and possible low bids and how they factor in to the need now for this amendment. John Flansberg, Director of Public Works, stated that due to restrictions that were needed in order to keep the plant in operation, and because of the nitrification issues, the bids came in much over the engineer's estimate. The amount of work in the scope is basically being reduced to avoid some of the operational issues that were driving up the cost.

Glen Daily, City of Reno Public Works Associate Civil Engineer, explained that during construction of the new septage receiving facility at the Truckee Meadows Water Reclamation Facility (TMWRF) there were a number of unanticipated situations that affected the critical path of the project. Those issues are summarized in the Staff Report.

Council Member Brekhus asked if professionals on the consultant list can be removed from the list for incorrectly scoping a project. Mr. Flansberg stated that if it was an ongoing issue, it could be addressed directly with the consultant. Those are issues that would be looked at for future ranking of the consultant list, which is ranked about every
two years. With this particular item there were enough extenuating circumstances that it was not something that would have been caught.

Council Member McKenzie expressed concern regarding using the same engineering firm to do the design and the construction management, and questioned whether the design phase was done properly. Mr. Flansberg explained that the design engineer does not control what type of equipment the contractor uses and how they do the job, which can affect how much time it might take them to do the work. Mr. Flansberg also stated that the issue isn't necessarily that the consultant missed that there would be rock but maybe it was just the methods and means that were used for the excavation that took longer than what would be expected when their construction management contract was put together.

Council Member McKenzie suggested the need to consider whether the engineering firm is doing a good job up front if they are coming back frequently for this type of amendment.

Don Wier, owner of Reno Dodge, stated other access is available and he would probably never have a need to put a driveway there.

Council Member Delgado and Mr. Wier discussed traffic congestion and safety issues.

Mayor Schieve called for public comment.
